

PAST PERFORMANCE

NAVFAC SOUTHEAST- NAS JAX

DDI Southeast provided the materials, equipment quality control, supervision, and labor required to complete the exterior renovations to an 80,000 square foot storage facility. DDI was also able to provide assistance with the scope to include architectural drawings, and the design for the 1,700 lf of top floor framing, and glass panel change out. This was a \$1,021,592.00 project and was completed October 4, 2018, 30 days ahead of schedule.

CLAY COUNTY FARM BUREAU BUILDING

This was a truly a "Turn-Key" project where DDI provided the Design-Build, site-work, architectural, engineering, supervision, quality control, labor, and materials to construct a new 8,100 square foot office building. This was a time sensitive project concerning immanent domain in Florida, and the entire project was completed in just 119 days on April 13, 2018.

Project amount: \$1,580,891.00

NAVFAC SOUTHEAST- NAS JAX

DDI Southeast provided the necessary supervision, safety, quality control, labor, equipment, containment, disposal, and materials to remove and encapsulate lead containing materials within the structure of the base Automotive shop. Our Environmental Team possesses a combined 75 years of experience working with the department of defense and other government agencies. Project amount \$57,165.00

NAVAFC SOUTHEAST- NAS JAX

DDI Southeast provided the supervision, quality control, safety, labor, equipment, and materials to renovate Bldg. 101-i. This scope included re-surfacing and epoxy of the floors, repairs to masonry walls, asbestos removal, lead abatement, re-roofing, new awnings, new metal siding, painting, new windows, and extensive structural repairs to the existing roof deck and supports. This project was a \$ 765,000.00 project and was completed in January of 2018, 36 days ahead of schedule.

NAVFAC SOUTHEAST- NAS JAX

DDI Southeast provided the design, architectural drawings, supervision, safety, equipment, labor, and materials needed to tear-off the existing roofs on 4 separate building located at the base water treatment facility and install new ISO tapered roofing systems, that increased the insulation rating from the existing roofs by 400%. By introducing this system to our customer we were able to reduce the down time of the building and save the government on energy cost for that building for years to come. Project amount: \$ 91,860.00

EMERITUS ASSISTED LIVING FACILITY

DDI Southeast provided the design, engineering, D.O.T. safety, supervision, quality control, labor, equipment, and materials to remove and replace The underground storm water drainage system that was in disrepair under the existing parking lot and property. Once the replacement was completed DDI capped the existing 128,000 sf parking lot and replaced all D.O.T. aprons. Project amount \$597,609.00
